

2025 ANNUAL CPP REVALUATION NOTICE

The operations of Financial Guaranty Insurance Company (“FGIC”) are subject in all respects to the terms of the First Amended Plan of Rehabilitation for FGIC, dated June 4, 2013 (together with all exhibits and supplements thereto, as the same may be modified from time to time, the “Plan”).¹ This notice is being provided pursuant to Section 7.11(A)(c) of the Plan.

FGIC conducted its annual CPP Revaluation for 2025 (the “2025 CPP Revaluation”) in accordance with the procedures set forth in Section 1.5 of the Restructured Policy Terms, to re-evaluate the 64.50% CPP that was approved by the New York State Department of Financial Services (the “NYSDFS”) effective November 25, 2024, in connection with FGIC’s annual CPP Revaluation for 2024, in order to determine whether, consistent with the Run-Off Principles, the CPP should remain the same or be adjusted upward or downward. Houlihan Lokey Financial Advisors, Inc., which was the CPP Revaluation Firm for each of FGIC’s prior annual CPP Revaluations, acted as the CPP Revaluation Firm for the 2025 CPP Revaluation (the “2025 CPP Revaluation Firm”).

The 2025 CPP Revaluation is based on Run-Off Data as of December 31, 2024. The Run-Off Period used in the 2025 CPP Revaluation commences on January 1, 2025 and is projected to end in 2049. As part of the 2025 CPP Revaluation, FGIC’s cash flows are projected during the Run-Off Period based on a Stress Scenario and a Base Scenario. The Stress Scenario is intended to be used in connection with determining whether the CPP should remain the same or be adjusted upward or downward.

Following FGIC’s submission of the CPP Revaluation Filing with respect to the 2025 CPP Revaluation, and after having requested and obtained additional information relating to such CPP Revaluation Filing, the NYSDFS approved an upward adjustment of the CPP from 64.50% to 66.00%, effective December 3, 2025.

Under the Base Scenario in the 2025 CPP Revaluation (which gives effect to the 66.00% CPP approved by the NYSDFS), the CPP is projected to increase over time, ultimately to 100% after conducting the CPP Revaluation for 2042. This projected CPP increase under the Base Scenario in the 2025 CPP Revaluation arises because of differences in the assumptions used under the Base Scenario as compared to the Stress Scenario in the 2025 CPP Revaluation, including, among other things, (i) losses are projected to be realized at lower levels, (ii) investment income is projected to be generated at higher levels, (iii) expenses are projected to be incurred at lower levels, and (iv) the total cash buffer is projected to decrease over time.

The Stress Scenario and Base Scenario figures and other information herein are referred to collectively as the “2025 CPP Revaluation Estimates”.

¹ Capitalized terms used and not otherwise defined herein have the meanings ascribed to them in the Plan.

Accordingly, the estimates and assumptions underlying the 2025 CPP Revaluation Estimates are inherently uncertain and subject to significant business, economic and other risks and uncertainties.
